Infineum B402

COMBUSTION IMPROVER

IMPROVE FUEL ECONOMY - REDUCE EMISSIONS - MINIMISE SLUDGE

2% average fuel savings across 10,000+ hours of trials on over ten vessels

Make decarbonisation clean sailing

Improve emissions with up to

- 16% SOx reduction
- 40% CO reduction
- 4% NOx reduction

Through better combustion of fuel

Recommended treat rate

1 L per 2 MT

Combustion Improver Benefits

- **Promotes more complete combustion** increasing fuel efficiency and preventing emissions
- **Prevents sludge from depositing** reducing maintenance costs and operational downtime
- **Decreases the formation of caustics** increasing scrubber lifetimes and decreasing operating costs

Infineum B402 is a dual-purpose additive designed to improve combustion and combat sludge. By improving combustion, it converts more fuel to power in the engine and prevents the formation of harmful pollutant gases. By stabilising sludge, it decreases sludge disposal costs through reducing auto filter ejections by 34%.
